Google Cybersecurity Certificate | Google IT Support Certificate https://hwmetm.github.io/Portfolio-V2/

SUMMARY

Computer Science graduate with a year of hands-on IT support experience and a focus on web development and cybersecurity. Comfortable troubleshooting hardware, operating systems, and network issues, and currently building practical security tools.

SKILLS

- Programming Languages: JavaScript, HTML, CSS, SQL | Foundational: Python, Java, C++
- Web & API Development: REST API Integration (Fetch API, JSON parsing), DOM Manipulation, Chrome Extensions.
- Programming Concepts: Object-Oriented Programming (OOP), Data Structures, Relational Databases.
- Developer Tools: Git, GitHub, GitHub Pages, VS Code, Linux CLI Basics
- IT & Networking: Windows OS Troubleshooting, TCP/IP, DNS, DHCP, LAN/Wi-Fi Diagnostics, Hardware & Printer Support.

PROJECTS

NIST Software Vulnerability Scanner | HTML, CSS, JavaScript, NIST NVD API

- Built a front-end web tool that connects to the public NIST National Vulnerability Database (NVD) REST API to search for known software vulnerabilities (CVEs).
- Used JavaScript's fetch() API to handle asynchronous requests and parse nested JSON responses, displaying CVE IDs, descriptions, and severity ratings.

Business Finder Web App | HTML, CSS, JavaScript, Google Places API

- Created a single-page application that queries the Google Places API to look up local businesses and display contact and location details.
- Added a client-side export feature in JavaScript that formats search results into comma-separated values for direct CSV download.

Browser Notes Extension | HTML, CSS, JavaScript, LocalStorage

- Built a lightweight in-browser extension for quick note-taking without leaving the active tab.
- Used DOM manipulation to add, edit, and delete notes, and browser localStorage to keep notes saved between sessions.

EXPERIENCE

IT Support Intern | North West CET College | April 2024 – March 2025

- Provided day-to-day technical support for college staff and students, diagnosing and fixing hardware, software, and Windows OS issues across campus workstations.
- Set up and configured new desktops and laptops, installed required software packages, and applied routine system and application updates.
- Troubleshot local network connectivity problems (cabling, Wi-Fi, IP configuration, and DNS issues) to get users back online quickly.
- Configured, maintained, and repaired shared office printers and scanners.
- Logged support issues and documented straightforward fixes for recurring technical problems.

EDUCATION

- Advanced Diploma in Computer Science | Tshwane University of Technology
- National Diploma in Information Technology | Tshwane University of Technology
