Summary

Detail-oriented IT Professional with a strong foundation in system administration, endpoint security, and web development. Proven success in troubleshooting, maintaining 99% uptime, and strictly enforcing security baselines for 200+ users. Bringing hands-on experience in scripting (PowerShell/Bash), vulnerability checking, and front-end architecture. Eager to leverage this hybrid background in security, and coding to transition into testing, SOC, or development roles.

Skills

- Vulnerability checking and system testing during deployments
- IT security practices (workstation hardening, access control, patching)
- Endpoint security management and threat monitoring (Nagios, Zabbix, SolarWinds)
- Detailed technical documentation and bug/issue reporting
- HTML, CSS, JavaScript
- SQL
- Scripting & Automation
- PowerShell and Bash scripting
- Comprehensive hardware, software, and network troubleshooting (TCP/IP, DNS)
- Microsoft 365 Administration & Active Directory User Management

Professional Experience

IT Support Intern | North West CET College | April 2024 – March 2025

- Hardened 150+ workstations by implementing security baselines and performed rigorous vulnerability checks and system testing during software deployments and OS upgrades.
- Resolved 95% of service desk tickets on first contact, successfully troubleshooting edge cases and documenting technical issues to ensure 98% user satisfaction.
- Applied critical security patches with 100% compliance across 200+ endpoints, strengthening network defenses and ensuring product stability.
- Monitored systems and network performance, maintaining 99% uptime and achieving a 98% resolution success rate on technical incidents.
- Administered Microsoft 365 accounts and licensing for 200+ users, achieving zero access failures.

Projects

Single-Page Web Application (SPA)

- Built functional data handling features including real-time search queries and content pagination, actively troubleshooting and refining code to handle varied user inputs.

Active Directory Lab Environment

- Built and configured a Windows Server 2019 domain controller, applying Group Policy Objects (GPOs) to enforce organizational security and compliance standards.
- Authored detailed documentation covering setup procedures, configurations, and troubleshooting steps.

Education

- Advanced Diploma in Computer Science | Tshwane University of Technology
- National Diploma in Information Technology | Tshwane University of Technology

Certifications

- Google Cybersecurity Professional Certificate
- Google IT Support Professional Certificate
